Career Objective

Software developer turned traveler, currently teaching English in South Korea, eager to return to coding and embrace new challenges.

Proficient in Object-Oriented Programming, and able to take high-level instructions and deliver results. Strong attention to detail, strong verbal and written communication skills, and works well in both team and independent environments.

Professional Experience

Funway / English Teacher

📅 August 2022 - August 2023 📍 Gangnam, South Korea

- Taught kindergarten through elementary school students reading, speaking and comprehension skills in a family run academy.
- Worked with a marketing agency and business owner to design and create a website using a full-service website builder. This led to an increase in student recruitment - <https://funway.co.kr/>

Chungdahm Learning / English Teacher

📅 June 2020 - June 2021 📍 Anyang, South Korea

- Taught elementary through middle school students test-taking skills in a communication focused classroom and online setting.
- Taught all levels, from rudimentary skills to high level debate classes.
- Created JS console scripts and a simple comment writing app to increase quarterly reporting speed for teachers by up to 50% - <https://storage.googleapis.com/commentwriter/index.html>

Developer Experience

Voya Financial / Software Developer

📅 September 2015 - February 2019 📍 Minneapolis MN

- Created a database-driven Content Management System for company representatives to create websites for their clients. Analytics at the time showed 100 pages created with 50,000 unique users and growing.
- Used Asp.net MVC to create and maintain multiple web properties.
- Created internal web-based administrative tools for company partners, allowing access to MSSQL database content in a user-friendly setting.
- Learned legacy code base for multiple tools and applications in order to find and eliminate software bugs.
- Worked with senior developers in an Agile/Scrum environment. Used pair programming and peer review to sharpen coding skills.

OEMHeaters / Web Developer

📅 May 2012 - September 2015 📍 Minneapolis MN

- Created jQuery apps that allowed users to create custom products, which increased sales and created leads. Example: <https://shorturl.at/cxCW1>
- Independently researched how to accomplish different tasks and adapted to changing requirements from stakeholders.
